

Benefits and Rewards for Utilization,
Services and Healthy outcomes

LIBERTY's administrative focus on
improving oral health outcomes allows
providers to focus on their practice.

With BRUSH, LIBERTY invests dollars
back into our provider community to
reward **prevention, early intervention,**
and ultimately, **sustaining wellness.**

About LIBERTY's BRUSH Program

Always striving to achieve our mission, LIBERTY Dental Plan (LIBERTY) is proud to announce the launch of our new **Benefits and Rewards for Utilization, Services and Healthy outcomes (BRUSH) program** and accompanying Alternative Payment Methodology (APM). Together, these efforts focus on prevention and member-centric intervention to detect oral health problems before they occur. LIBERTY's BRUSH Program works strategically with network providers to streamline preventive dentistry across the country; leading to **healthier outcomes for patients** by changing provider practice patterns from restorative to more preventive services.

LIBERTY's BRUSH Program engages the dental care team to take an active role in ensuring the patient's oral health while encouraging beneficiaries to establish and maintain a dental home and follow proper oral health routines.

BRUSH Program Goals:

- **Benefits** help engage patients in their oral health using risk-based tools
- **Reward** providers for healthy patient outcomes
- **Utilization** helps focus on the prevention of dental disease
- **Service** allows patients customized evidence-based preventive services based on individual risk assessments; and
- **Healthy outcomes** of the program improve long-term oral health and wellness

LIBERTY uses a **Clinical Chairside Caries Risk Assessment (CRA) Form** to assess caries risk and overall dental health, following the American Dental Association (ADA) CRA protocol. This form is available via LIBERTY's secure provider portal.

Triaged patients are directed to the most appropriate level of care through the completion of the CRA form. Based on the CRA's risk level (low, moderate or high), patients may receive additional services (such as exams, wellness counseling and fluoride varnish), above and beyond their usual benefit, covered by LIBERTY.

BRUSH Program Benefits:

LIBERTY's move towards **value-based care** produces better outcomes for patients while rewarding providers for helping patients improve their health. LIBERTY's BRUSH Program enables the right care at the right time. Through managed networks, patients are valued, engaged and are at the core of the health care delivery model. LIBERTY's BRUSH Program rewards positive outcomes such as disease prevention, health promotion and population health via financial incentives.

LIBERTY's **proactive approach** creates significant value via engagement throughout the continuum of dental care. LIBERTY's BRUSH Program and related APM is designed to proactively prevent oral disease while rewarding providers for healthy patient outcomes. LIBERTY's role is to streamline administrative processes; allowing providers to focus on transforming practice management and patterns of care.
